

## Services Provided by SNAMHS

SNAMHS offers a full range of inpatient and outpatient services for adults with mental illness.

**Intensive Service Coordination** Provides increased service coordination assistance for individuals who are diagnosed with a mental illness with felony legal involvement. Individuals are referred by the judicial system or agency programs. Intensive service coordination assists high-need individuals in getting services necessary to live in the community as well as understanding and complying with orders of court.

**Medication Clinic** Provides outpatient adult psychiatric, nursing and direct medication services, including prescribing and dispensing both injectable and oral medication. The latest, most effective medication is prescribed and dispensed through agency pharmacies. The services include limited and focused consultation with the patient about medication treatment and management. Individuals may be referred to other agency services when indicated.

**Mobile Crisis Team (MCT)** The Mobile Crisis Team (MCT) is a specialized unit that works with the Las Vegas area hospital emergency departments. The MCT is comprised of Licensed Clinical Social Workers who travel to local hospital ERs to evaluate patients on involuntary holds and when feasible, develop safe discharge plans that are presented to the ER physicians for approval. This service averts unnecessary psychiatric hospitalizations, saves ER personnel time, and reduces the number of psychiatric patients in the ERs. The MCT is available 7 days a week, 7am to 10:30pm.

**Outpatient Counseling Services** Provides counseling and psychotherapy to people in crisis or experiencing acute stress. Services begin with an assessment to identify individual problems and resources, set treatment goals, and plan treatment. Counseling and psychotherapy services are often linked to other agency services, as well as ongoing support or self-help groups in the community.

**Program For Assertive Community Treatment** Provides a specialized, multi-disciplinary team approach to service coordination and service delivery. The focus of this team is to elevate the level of functioning and provide a better quality of life for individuals with a serious mental illness. PACT is mobile and services are provided wherever necessary in the community.

**Psychiatric Urgent Care Services**

Provides telephone and/or face to face response to crisis intervention and mental health evaluations and entry into the agency's services. Rawson-Neal includes a 30 bed observation unit for those clients who may require temporary in-patient services.

Rawson-Neal Psychiatric Hospital 8am - 4pm  
 1650 Community College Drive Monday - Friday  
 Las Vegas, NV 89146 Best time to arrive is in the morning

Henderson Clinic Monday - Friday

486-6700

### Psychiatric Hospital

Provides acute psychiatric inpatient treatment for adults with serious mental disorders. A multi-disciplinary assessment is the basis of each individual treatment plan. The hospital provides intensive and comprehensive treatment and after care recommendations.

### Psychosocial Rehabilitation

The Psychosocial Rehabilitation Program (PSR) is an outpatient psychiatric rehabilitation program. The mission is to provide individuals with a mental illness with the skills they need to maximize their vocational potential and develop their own meaningful roles in the community. PSR focuses on empowerment and recovery through the provision of education & training, advocacy, support services and job development.

### Residential Support

Provides a range of community housing and assisted living options for individuals with serious mental disorders. Various levels of residential support and direct care are based on individual capacity for independent living. Alternative living arrangements include family group homes, supported living apartments, substance abuse treatment facilities, Housing & Urban Development programs, and specialized rehabilitation homes.

### Ryan White Title I Mental Health Services

This service is 100% funded through a Ryan White Title I Grant that is made available from the U.S. Department of Health and Human Services, HRSA and the Clark County Health District. The intent of this program is to maintain an individual's mental health at a level that affords them the ability to fully participate in their primary medical care plan.

### Senior Mental Health Outreach Program

Provides evaluation, counseling, and service coordination for adults age 60 and older. The Program will provide mental health services in the older adult's home if needed. The Program also provides community training on a variety of topics including mental health and aging. Funded by grants from Division for Aging Services.

## Allied Therapies

Provides therapeutic activities, leisure and wellness education, needs assessment, and progress evaluation for inpatient hospital clients. Staff include Recreation Therapists, Music Therapists, Art Therapists, Dance and Movement Therapists, and Exercise Physiologists. Groups and activities take place on hospital units, outside recreation areas, gymnasium, Art and Music Workshops

## Medical Records

The Health Information Services Department at Southern Nevada Adult Mental Health Services is committed to protecting the individual's privacy and also to give individuals served timely, accurate access to his/her medical records when needed.

## Service Coordination

An outpatient program with service coordinators supporting individuals in managing symptoms of their mental disorders, as well as linking and referring them to appropriate community resources. Service coordination provides on-going assistance to help individuals with serious mental illness achieve an optimum quality of life.
